## Web

Definitions of **mineral salt** on the Web:

- An inorganic metallic substance occurring naturally in the earth's crust that is compounded with another inorganic nonmetallic substance to form a salt.  
[www.ehealthmd.com/library/kidneystones/KS\\_glossary.html](http://www.ehealthmd.com/library/kidneystones/KS_glossary.html)
- The stable form of a mineral as it exists in solution (eg., salt (sodium chloride)).  
[www.hc-sc.gc.ca/food-aliment/nriia-raaii/frp-pra/water-eau/e\\_rfr\\_bottle\\_water\\_gloss.php](http://www.hc-sc.gc.ca/food-aliment/nriia-raaii/frp-pra/water-eau/e_rfr_bottle_water_gloss.php)
